INDEX

Anilkumar, A. V. *See* Lee, Anilkumar, Hmelo & Wang

Briggs, D. A., Ferziger, J. H., Koseff, J. R. & Monismith, S. G. Turbulent mixing in a shear-free stably stratified two-layer fluid, 175–208

Bühler, O. & McIntyre, M. E. On non-dissipative wave–mean interactions in the atmosphere or oceans, 301–343

Chisnell, R. F. An analytic description of converging shock waves, 357–375

Eisenga, A. H. M., Verzicco, R. & Heijst, G. J. F. van Dynamics of a vortex ring moving perpendicularly to the axis of a rotating fluid, 69–100

Eltayeb, I. A. & Hamza, E. A. Compositional convection in the presence of rotation, 277–299

Fedorov, A. V. & Melville, W. K. Nonlinear gravity–capillary waves with forcing and dissipation, 1–42

Ferziger, J. H. *See* Briggs, Ferziger, Koseff & Monismith

Hamza, E. A. *See* Eltayeb & Hamza

Heijst, G. J. F. van *See* Eisenga, Verzicco & Heijst

Hmelo, A. B. *See* Lee, Anilkumar, Hmelo & Wang

Koseff, J. R. *See* Briggs, Ferziger, Koseff & Monismith

Lee, C. P., Anilkumar, A. V., Hmelo, A. B. & Wang, T. G. Equilibrium of liquid drops under the effects of rotation and acoustic flattening: results from USML-2 experiments in Space, 43–67

McIntyre, M. E. *See* Bühler & McIntyre

Melville, W. K. *See* Fedorov & Melville

Merryfield, W. J. Effects of stratification on quasi-geostrophic inviscid equilibria, 345–356

Monismith, S. G. *See* Briggs, Ferziger, Koseff & Monismith

Narimousa, S. Turbulent convection into a linearly stratified fluid: the generation of 'subsurface anticyclones', 101–121

Nicolás, J. A., Rivas, D. & Vega, J. M. On the steady streaming flow due to high-frequency vibration in nearly inviscid liquid bridges, 147–174

Pelinovsky, D. E. *See* Voronovich, Pelinovsky & Shrira

Raman, G. & Taghavi, R. Coupling of twin rectangular supersonic jets, 123–146

Rivas, D. *See* Nicolás, Rivas & Vega

Shrira, V. I. *See* Voronovich, Pelinovsky & Shrira

Taghavi, R. *See* Raman & Taghavi

Tsai, W.-T. A numerical study of the evolution and structure of a turbulent shear layer under a free surface, 239–276

Vega, J. M. *See* Nicolás, Rivas & Vega

Verzicco, R. *See* Eisenga, Verzicco & Heijst

Voronovich, V. V., Pelinovsky, D. E. & Shrira, V. I. On internal wave–shear flow resonance in shallow water, 209–237

Wang, T. G. *See* Lee, Anilkumar, Hmelo & Wang
